THERMAL TREATMENTS

THE BENEFICIAL PROPERTIES OF THERMAL WATERS

Water has the leading role in Val di Pejo: glaciers, lakes, snow and mineral springs are some of its expressions. At Terme di Pejo, the *Antica Fonte*, *Nuova Fonte* and *Fonte Alpina* springs help to cure in a natural way some disorders of the joints, the venous and lymphatic flow, the skin, the respiratory tract, the gastrointestinal apparatus and the urinary tract.

The mineral springs of Val di Pejo originate in the bowels of the Ortles-Cevedale mountain massif, which encompasses the highest peaks of the Eastern Alps.

MEDICAL SERVICES PROVIDED

At Pejo Spa it is possible to benefit from the best spa treatments, even as part of the State Healthcare services, thanks to the presence of three different mineral springs – *Antica Fonte*, *Nuova Fonte* and *Fonte Alpina* – which are particularly suited to cure, in a natural way, many inconveniences of the joints, the venous and lymphatic flow, the skin, the respiratory tract, the gastrointestinal apparatus and the urinary tract.

PRE-TREATMENT MEDICAL EXAMINATION	30.00 €
ELECTROCARDIOGRAM	30.00 €
ORL EXAMINATION	80.00 €

HYDROTHERAPY

Fonte Alpina, poor in mineral salts, allows to eliminate the gallstone formations and the gravel located in the urinary system.

Antica Fonte, rich in iron and carbon dioxide, improves the biliary secretion, regulates the intestinal movements and rebuilds the iron reserves in case of anaemia due to lack of iron.

Nuova Fonte, thanks to the presence of bicarbonates and mineral salts, staunches acids and helps gastric emptying.

MUD-BATH THERAPY

MUD THERAPY

The application of muds ripened with ferruginous-bicarbonate mineral water from *Nuova Fonte* reduces joint inflammations and loosens muscular contractions. The treatment allows a protracted painkilling action.

THERMAL CARBON DIOXIDE BATH

Gases and mineral salts, in high concentration, donate relief against pains of a muscular and articular nature. During immersion, the carbon dioxide bubbles stick to the skin and perform a delicate and continuous micro massage: the general feeling you can experience is one of pleasure and relax.

VASCULAR THERAPEUTIC BATH THERAPY

The hydrostatics pressure and the chemical substances in the solution induce the activation of the network of small capillaries distributed in the skin and in the sub-cutaneous tissue. As a result of this intensive revascularization, fluid stagnations are drained, with a prolonged benefit for those suffering from dysfunctions of the arterial and lymphatic circulation.

INHALATION THERAPY

With the inhalation treatment the more or less finely fractioned thermal water, and the gas present in it, are introduced in the respiratory airways and the vaporization of *Antica Fonte* mineral water performs a direct action on the respiratory mucous membranes.

When contacting the mucous membranes of the respiratory tract, the microscopic particles of mineral water, rich in bicarbonates, contrast the inflammatory processes of allergic and chronic nature. The cure, repeated every day, has an anticatarrhal and decongestant effect, greater if undertaken continuously for 12 days.

PHYSIOTHERAPY - REHABILITATION

Rehabilitation in orthopedic pathologies and in the outcomes of a trauma is performed by physiotherapists in the thermal swimming pool. The *Nuova Fonte* mineral water makes the recovery of motility easier and contrasts articular pain. In order to make the recovery of the motor activities faster, it is possible to take advantage of the combination of professional physiotherapy and thermal hydrotherapy, particularly in the outcomes of sports accidents and traumas.

WELLNESS

AN ALL-ROUND WELLNESS EXPERIENCE

Terme di Pejo is not only a healing resort, but an authentic wellness oasis in a holistic sense, which you can turn to in order to recover your psycho-physical balance through a pleasant emotional and sensorial involvement.

The wellness centre is connected with the fitness area, composed of a fitness room and a gym with calisthenics, the swimming pool area and the massage and beauty treatment area.

Particular attention has been dedicated to energy saving and environmental protection through the use of eco-compatible and locally eco-friendly material, such as wood and stone.

MASSAGES

Through kneading and gradual pressures, the massage helps to loosen up muscular tensions, alleviate pains and drain fluids. In addition to the more traditional techniques aimed at rehabilitating particular body parts, at Terme di Pejo you can experience treatments coming from the eastern culture for a general relaxation and an energetic re-balance. Techniques proposed: partial massage, general massage, relaxing massage, sports massage, lymph-drainage, Ayurveda and hot stone.

PARTIAL MASSAGE (25') 35.00 €

Relieves muscle tension in specific areas of the body.

REGULAR MASSAGE (50') 65.00 €

Reduces muscle contraction and pain in addition to helping to restore proper joint functionality.

HEAVEN AND EARTH MASSAGE (40') 55.00 €
